

Green Loans: Coming Soon!

March 28, 2018 - On March 21, 2018 the LMA and APLMA published a set of Green Loan Principles with the support of the International Capital Market Association (ICMA). These Green Loan Principles build on and refer to the Green Bond Principles of ICMA. The Green Bond Principles are internationally recognized voluntary issuance guidelines that promote transparency, disclosure and reporting in the green bond market. As reported by TR-LPC, the green loan market is growing after a slower start than its bond market counterpart, with increasingly large deals coming to market. The LSTA is launching its green loans initiative in April. For more information on the issue, please contact tvirmani@lsta.org.
