

IMN's ABS Barcelona

June 6, 2018 - Over 3700 people attend IMN's 22nd Annual Global ABS Conference in Barcelona and LSTA general counsel Elliot Ganz participated in two panels, the first on recent regulatory trends and the other on global risk retention. The main takeaway from both panels: there is a positive vibe in the US, with the end of risk retention and a real possibility for Volcker reform, while in Europe and elsewhere regulatory obligations are generally stabilizing and at least not getting worse.
